

Every year before the New Year, Santa repairs his hand-made, never-getting-old shoes made of nice, round crust leather, places his travel clothes in his full-veg-tanned leather luggage, puts on his classical red uniform together with other leather accessories, fills his soft but strong napa leather sack with numerous beautifully-made present packs and becomes ready for the gift delivery journey.

We don't know which nice gifts Santa will leave under your tree this year but

we wish 2016 brings you more smile, health and success!
